

JOOMLA! TEMPLATE: JV-RESTAURANT USERGUIDE

INTRODUCTION – WHAT IS JV RESTAURANT?

The screenshot displays the JV Restaurant Joomla! template homepage. At the top, there is a dark green header with social media sharing icons (Facebook, Blogger, e, Twitter) on the left, and 'Login | Register' and a search bar on the right. Below the header, the site title 'JV Restaurant' is prominently displayed. A navigation menu includes 'Home', 'About Joomla', 'News & Events', 'Services', 'Contact Us', and 'Typography'. The main content area features a large banner image of fresh bread and a pitcher of milk, with the text 'Aliquam luctus pellentesque nunc' overlaid. To the left, there is a 'Login Form' with fields for 'Username' and a password, a 'Remember Me' checkbox, and a 'Log in' button. Below the login form is a 'Gallery' section with six placeholder images, each labeled 'Title'. To the right of the gallery is a 'Welcome Frontpage' section with a large image of bread and a 'Read more' button. The text in this section is placeholder Lorem Ipsum.

JV Restaurant is Joomla! Template developed by Joomlavi, designed mainly for restaurants and food-services websites, although it can easily be adopted for other purposes.

This template, like all templates developed by Joomlavi group, consists of two parts: The theme managing component called JV Framework and the theme/template named JV Restaurant.

DOWNLOADING JV RESTAURANT – WHERE TO FIND IT?

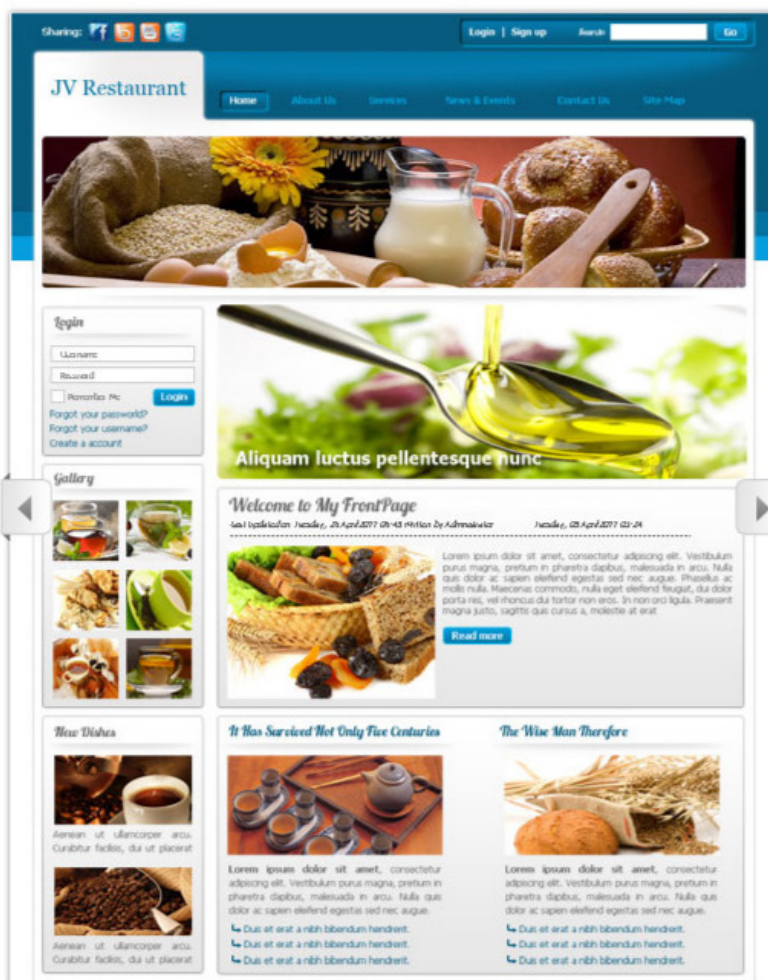

To download JV Restaurant, you need to register a username on <http://Joomla-lavi.com> and purchase a package for download privileges.

You can find JV Restaurant within the 'Joomla! Templates' pages (which can be found in the 'Joomla! Products' sub-menu).

You can also go to JV Restaurant's page directly using this URL: <http://www.joomla-lavi.com/joomla-templates/10-joomla-templates/jv-restaurant.html>

JV Restaurant

Joomla! 15: [Live Demo](#) [Download](#) [Position](#)

Joomla! 17: [Live Demo](#) [Download](#) [Position](#)

'You are the owner of a restaurant, a food stall or a neat café. You are setting up a website to help your place gain more recognition and boost the sale.'

If the above description fit your case, then perhaps you should take a look at JV-Restaurant's demo, it might be just what you need for that site.

This template, created for restaurants and similar services' websites, was designed to be easy on the eyes, with a simple but beautiful layout that allow you to show the special dishes and various articles about food on the front page.

JV Restaurant, like most other JV-Templates, comes with 4 color variants; in this case, they are: green, blue, orange and purple.

It also comes with various tools to make customizing layout much less of a burden on the user.

Let introduce your restaurant/food stall/ café to the world with JV Restaurant.

Features

- Support RTL
- Quickstart (Joomla! install that includes demo data)
- Mobiles: iPhone/iPad, Android, handheld theme
- Drop and drag module position.
- Validate xhtml and CSS
- 100% tableless CSS
- CSS3 powered
- Multiple Layout Options
- Google Fonts
- SEO Optimized
- 4 Colors
- Flexible template and column widths
- Custom theme profile
- Compatible: Firefox, IE 7+, Chrome, Safari, Opera ...
- Columns: Unlimited
- Typography
- Add new position, block (unlimited number of positions and blocks), edit and delete position and block...

Within JV Restaurant's page, there are two set of buttons under the theme's screenshot, one for Joomla! 1.5 and one for Joomla! 1.7. Each set consists of 3 buttons: 'Live Demo', 'Download' and 'Position'

Clicking on 'Live Demo' would redirect you to a demo-site using JV Restaurant. This is also what your site will look like when using a Quick-start version of this template.

Clicking on 'Position' will show open up the demo-site, with all the positions visible.

Clicking on 'Download' will open the download page for either the Joomla! 1.5 version or Joomla! 1.7 version.

There will be multiple files in the download page. Before selecting which file(s) to download, please consider what you are planning to do.

-If you are setting up a new site, the Quick-Start version is the best choice, because it will install an entire new site with all associated extensions and styled to look like the template's live demo.

-If you already have a site and don't want to replace it, or you only want the template without extensions and styling, the Theme version will be your choice. Installing a theme will give you only a new template/theme without any extra extension or data loss.

After you have confirm the file(s) you need, select them by ticking the box(es) in front of said file(s), then click download.

If the file you downloaded has 'unzip_first' in its name, please extract it before continuing with the installation.

INSTALLING JV RESTAURANT – HOW TO INSTALL JV RESTAURANT WITH A QUICKSTART OR THEME VERSION

Installing JV Restaurant template with Quick star version:

To install a QuickStart version of JV Restaurant, follow the following steps:

- Extract the file with 'unzip_first' in its name.
- Extract the resulting file into a folder. For example, let name the folder 'Restaurant'.
- Copy or move said folder into your server's.
- Open your browser and open the URL to the folder you copied. For example, on a local host, the URL would be: `http://localhost/Restaurant/`
- Install the quickstart template the same way you install a new Joomla! instance using browser. During the installation process, you must remember to install Sample Data by clicking on the Install Sample Data button.

Joomla! 1.7.3 Installation Joomla!

Steps

- 1 : Language
- 2 : Pre-Installation check
- 3 : License
- 4 : Database
- 5 : FTP Configuration
- 6 : Configuration
- 7 : Finish

Main Configuration Previous Next

Site Name

Enter the name of your Joomla! site.
Optional: You can also enter Meta Description and Meta keywords for your site.

Basic Settings

Site Name *

Advanced Settings - Optional

Confirm the Admin email and Password.

Enter your email address. This will be the email address of the Web site Super Administrator.
Enter a new password and then confirm it in the appropriate fields. You may change the default username **admin**. These will be the Username and password that you will use to login to the Administrator Control Panel at the end of the installation.
If you are migrating, you can ignore this section. Your current settings will be automatically migrated.

Confirm Admin Password *

Load sample data

Important! It is strongly recommended that new Joomla! users install the default sample data. To do this click on the button *before* moving to the next stage.

1. Sample data: Before leaving the installation, you can populate the site database with data. There are two ways to do this:

1a. Default sample data can be inserted. To do this, make sure the Default English (GB) Sample Data is displayed in the dropdown and click the Install Sample Data button.

1b. Custom sample data can be inserted. To do this, choose an available sample data in the dropdown and click the Install Sample Data button.

2. Clean Installation: If you wish to perform a clean installation, enter the site name, admin email and choose a password. Then

Sample Data set: Default English (GB) Sample Data

Install Sample Data

Remember to install Sample Data. It contains the template, extensions and styling.

Installing sample data is strongly recommended for beginners. This will install sample content that is included in the Joomla! installation package.

Installing JV Restaurant template with Theme version:

You will need to install a theme managing component called JV Framework before you can install JV Restaurant as a theme.

To install JV Framework:

- Click on JV Framework download on the upper right corner, just under user menu.

The screenshot shows the Joomla! Extension Directory page for JV Framework files. It features a table with columns for File name, Type, Date, and Version. The table lists several files, including 'Com JV Framework for Joomla 17' (version 1.6.4.4) and 'Quickstart JV Melody for Joomla 15' (version 1.5.4.4). Below the table, there is a 'Download' button and a section titled 'INTRODUCTION' with a sub-header 'POWER IN YOUR HAND!'. The introduction text describes the framework's features and encourages users to try it. To the right of the main content, there is a sidebar titled 'Most Download Extensions' listing other extensions like 'JV Dating 17' and 'JV Consultant 17'.

- In the new page, select the version(s) you need and click download. There are different versions for Joomla! 1.5 and Joomla 1.7. From JV Framework version 4.5 and newer, the 'install file' can be used for all version of Joomla!.
- If the file you downloaded has 'unzip_first' in its name, remember to extract the file before continuing installation. The resulting file(s) from extracting an 'unzip_first' file will be called 'install file(s)' henceforth,
- Log into your Joomla! back end, select extension manager (Joomla! 1.7) or Install/Uninstall (Joomla! 1.5) from extension manager menu.

The screenshot shows the Joomla! Administration interface, specifically the 'Extension Manager: Install' page. The page has a navigation bar with 'Administration' and the Joomla! logo. Below the navigation bar, there are tabs for 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The main content area is titled 'Extension Manager: Install' and contains three sections: 'Upload Package File', 'Install from Directory', and 'Install from URL'. The 'Upload Package File' section has a text input field for the package file path, a 'Browse...' button, and an 'Upload & Install' button. The 'Install from Directory' section has a text input field for the install directory and an 'Install' button. The 'Install from URL' section has a text input field for the install URL and an 'Install' button. There are three callout boxes: a green one pointing to the package file input field with the text 'This field is where you enter the path to your 'install file'', a red one pointing to the 'Browse...' button with the text 'You can also use this button to browse your 'install file'', and a purple one pointing to the 'Upload & Install' button with the text 'Click on this button to start the installation process'. At the bottom of the page, there is a footer that reads 'Joomla! is free software released under the GNU General Public License. Version 1.7.3'.

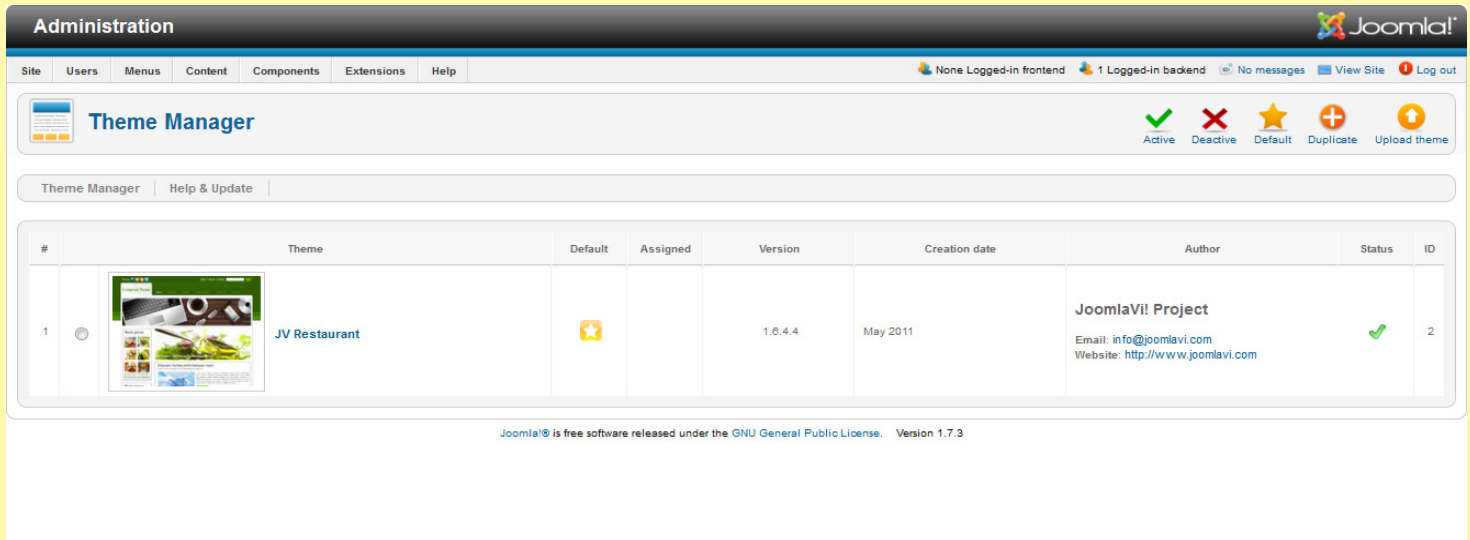

- On install tab, type the path to your file into the blank field of 'install from package' section or click on 'browse' to find it manually
- Click on 'Upload & Install'.
- Now you can find 'JV Framework' from the component menu.

Installing JV Restaurant theme

Using upload theme:

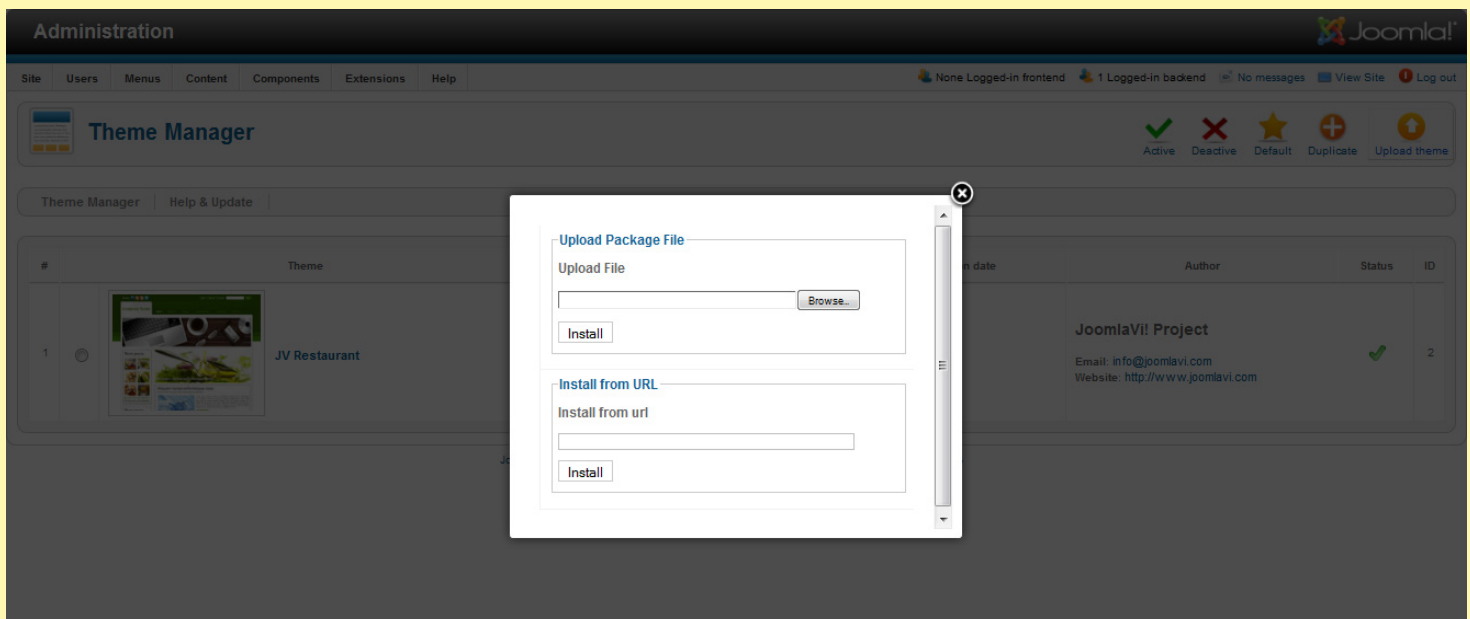

*Version 4.4 (1.5.4.4 or 1.7.4.4) or older:

- Rename your install file and remove the number at the end, leaving only the theme's name.
- From back end, access JV Framework from component menu.

-Inside JV Framework theme manager page, click on the upload theme button.

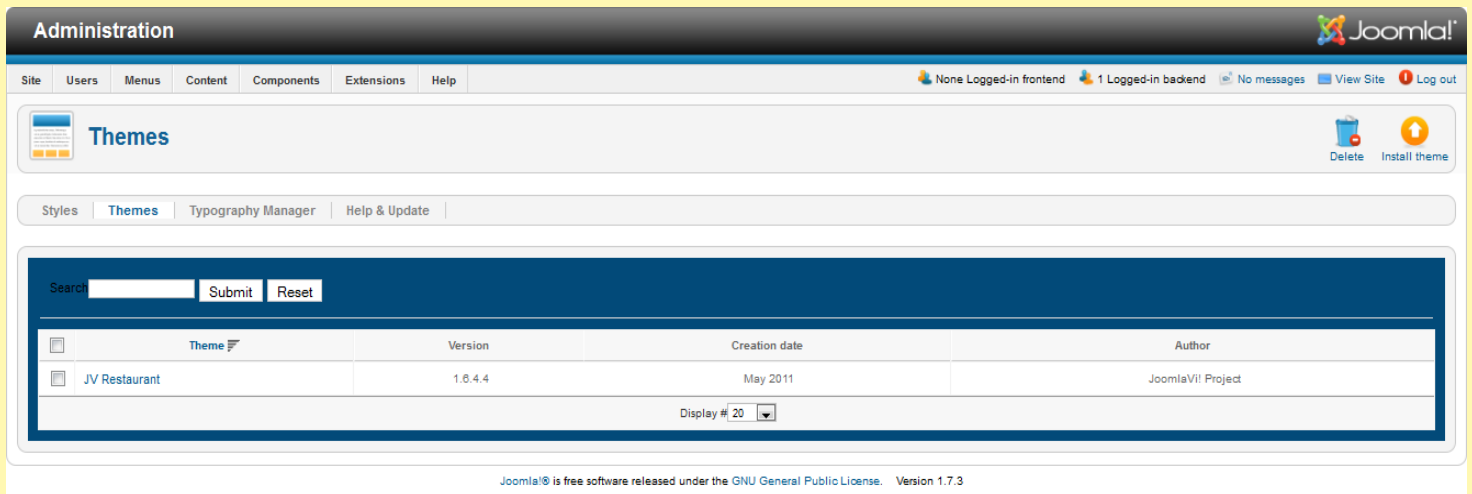

- type the path to your file into the blank field or click on browse to find the theme manually.

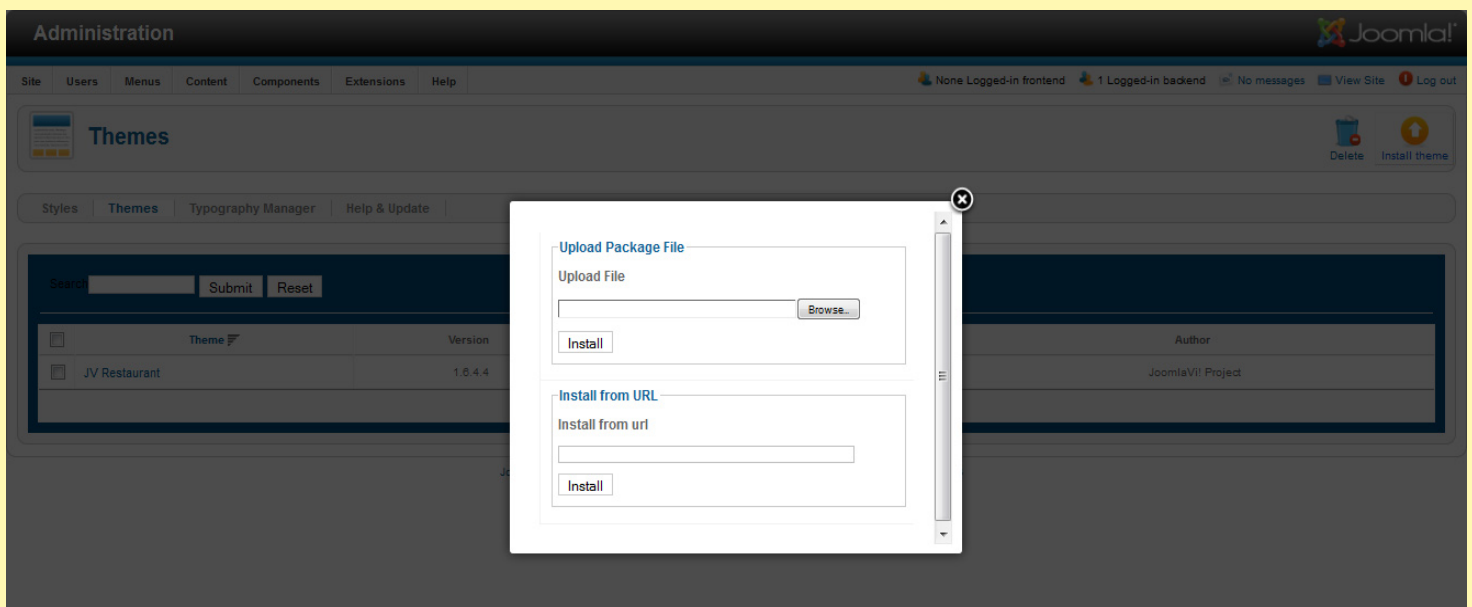

-Click on install to finish uploading the new theme.

*Version 4.5 or newer:

- From back end, access JV Framework from component menu.
- Click on tab 'Theme manager' tab.

- Inside JV Framework Theme manager page, click on the 'Install theme' button.

- Type the path to your file into the blank field or click on browse to find the theme manually.
- Click on install to finish uploading the new theme.

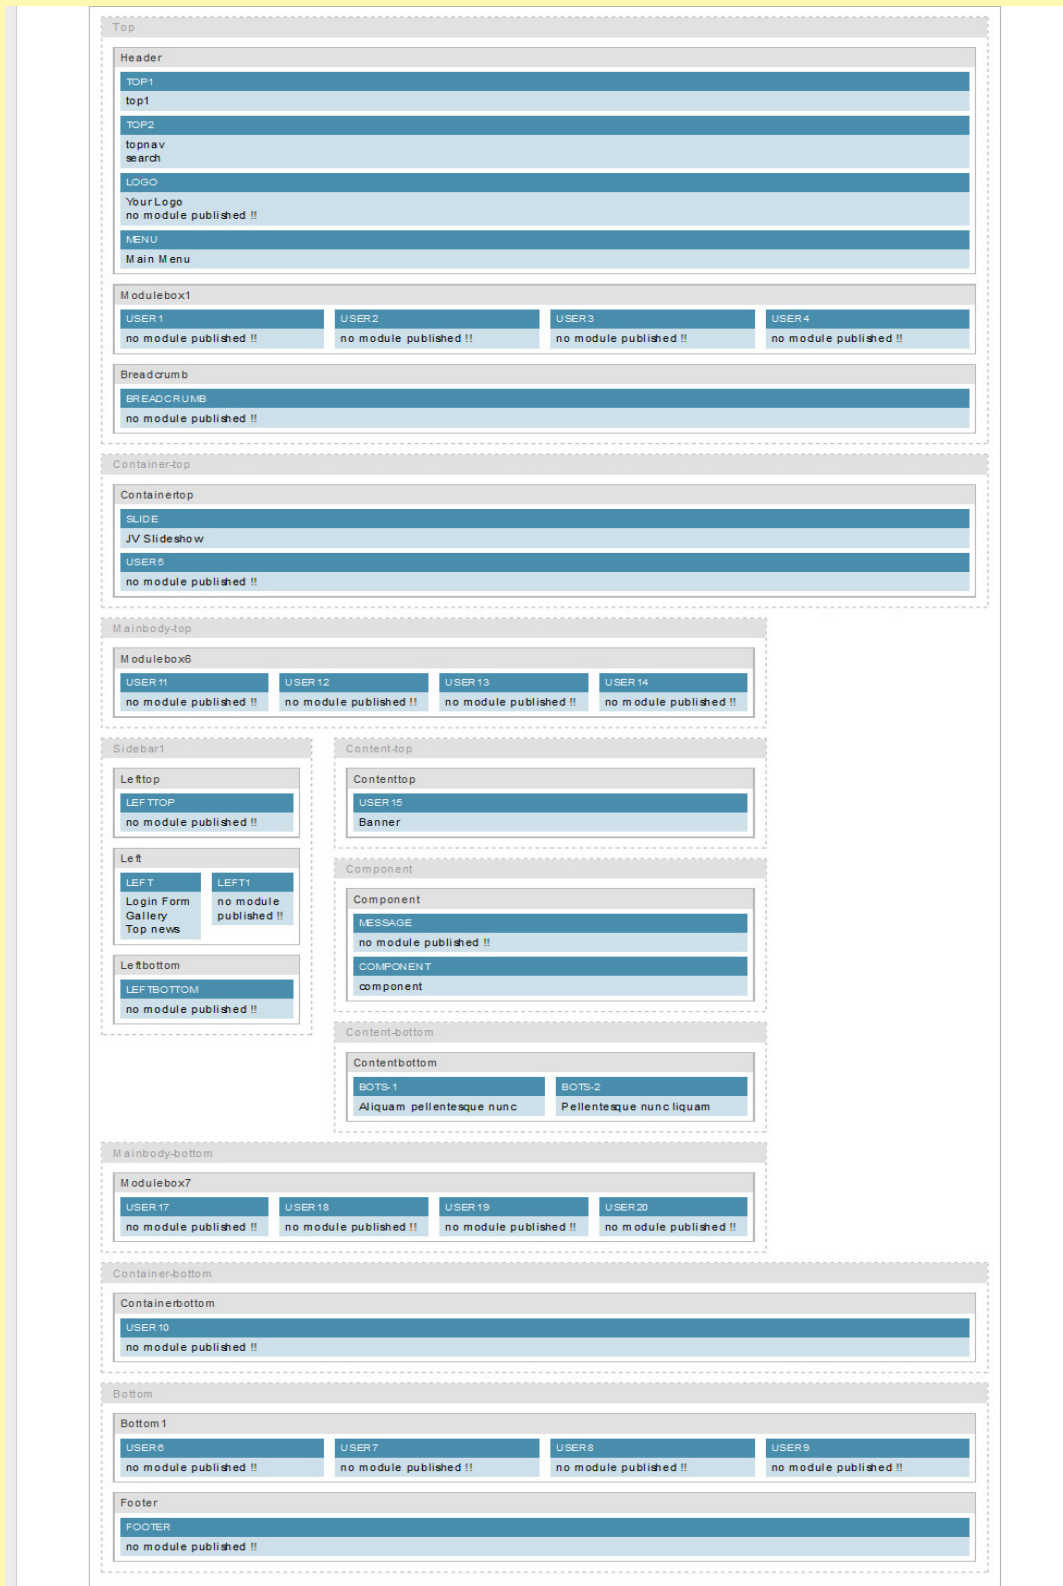

Installing manually:

- Extract the theme's 'install file'.
- Copy the resulting folder to <templates>\jv-framework\themes> within your site's source folder.
- return to JV Framework's theme manager in your site's back end and check your theme list.

MANAGING JV RESTAURANT WITH JV FRAMEWORK – JV RESTAURANT LAYOUT

For the basic functions of JV Framework, please refer to JV Framework User guides

The main difference between themes when using JV Framework is the position layout. The following image will show the default layout of JV Restaurant:

EXTENSIONS OF JV RESTAURANT

If you used the Quick-start version of JV Restaurant template, the following extensions will be included, styling included. For a JV Restaurant theme user, you would have to download and install these extensions manually:

<input type="checkbox"/>	Title	Status	Position	Ordering	Type	Pages	Access	Language	ID
<input type="checkbox"/>	Aliquam pellentesque nunc	✓	bots-1	1	JV News	Selected only	Public	All	25
<input type="checkbox"/>	Pelentesque nunc liquam	✓	bots-2	1	JV News	Selected only	Public	All	26
<input type="checkbox"/>	Login Form	✓	left	1	Login	All	Public	All	16
<input type="checkbox"/>	Gallery	✓	left	2	Custom HTML	All	Public	All	23
<input type="checkbox"/>	Top news	✓	left	3	Custom HTML	All	Public	All	24
<input type="checkbox"/>	Main Menu	✓	menu	1	Menu	All	Public	All	1
<input type="checkbox"/>	Breadcrumbs	○	position-2	1	Breadcrumbs	All	Public	All	17
<input type="checkbox"/>	Banners	○	position-5	1	Banners	All	Public	All	18
<input type="checkbox"/>	JV Slideshow	✓	slide	1	JV Slideshow	All	Public	All	22
<input type="checkbox"/>	top1	✓	top1	1	Custom HTML	All	Public	All	19
<input type="checkbox"/>	topnav	✓	top2	1	Menu	All	Public	All	20
<input type="checkbox"/>	search	✓	top2	1	Search	All	Public	All	21
<input type="checkbox"/>	Banner	✓	user15	1	Random Image	Selected only	Public	All	27

JV Slideshow (Module)

*Setting up JV Slideshow to make it similar to quick-start/demo:

-Prepare a folder where you store the images you wanted to use. If you wanted to display thumbnails for your slides, create a “thumbnails” folder within the image folder and store the resized images you want to use as thumbnails there .

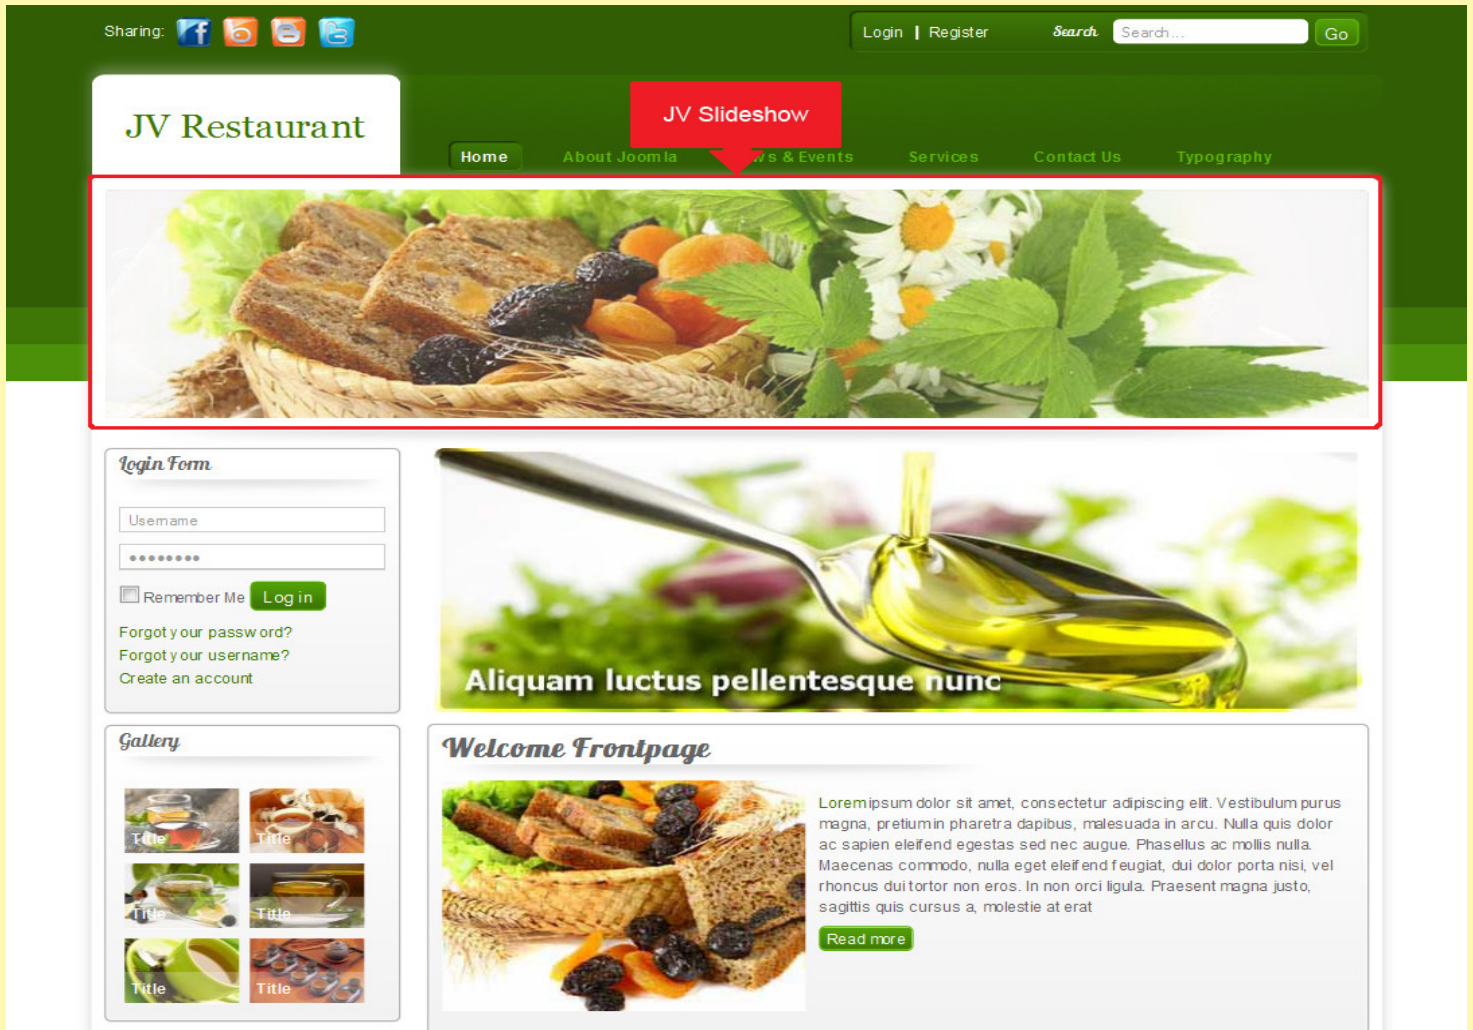

-Within your site back end, go to Module Manager and create a JV Slideshow type module. You can also use the default module “JV Slideshow”

-Inside Module mod, set the location to your image folders, select your source and set the parameters.

-Set the module to published/enable, assign it to position ‘slide’ on all pages.

-Save the setting and click on Preview (Joomla! 1.5) or View Site (Joomla! 1.7).

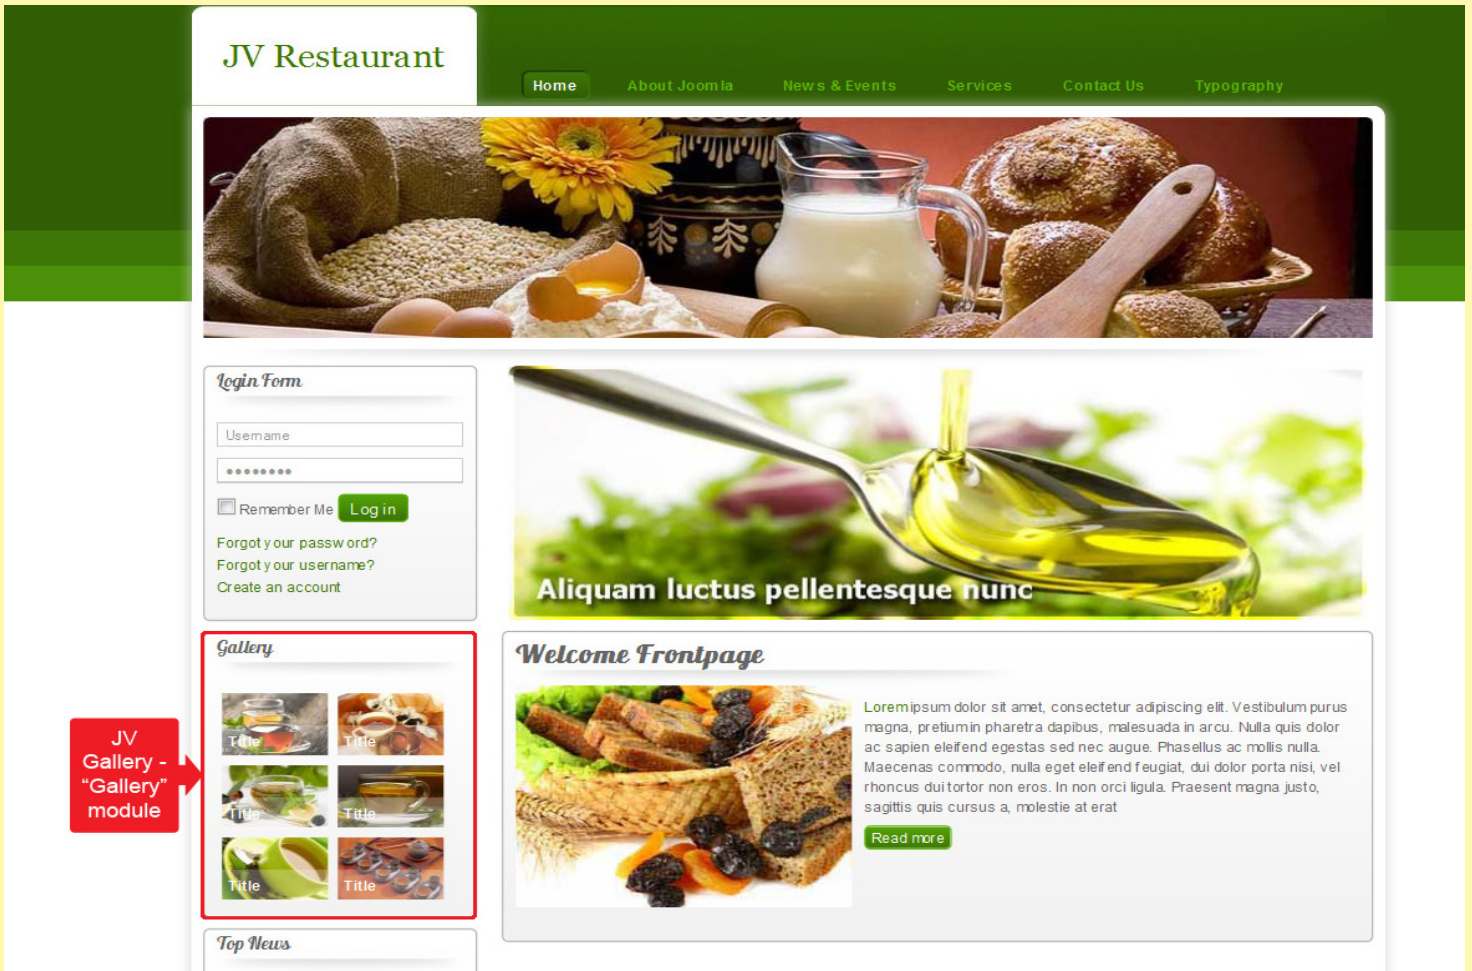

For the parameters’ effects, please read JV Slideshow User Guide

JV Gallery (Plug-in):

* Using JV Gallery to make your site look more like a quick-start installation and the demo site:

- Create a folder in your website's directory and upload your image to that folder.
- If you want to use thumbnails, create another folder named 'thumbnail' in the aforementioned one and upload the thumbnails to it (the thumbnails should have the same name as their respective full size versions)
- Go to module manager and create a Custom HTML type module named 'Gallery'
- Enable the module and assign it to position 'left' on all pages.
- In the Custom Output section, set up a gallery with the images you upload in this module using gallery code or the 'Insert Gallery' button.

A few notes on how to insert JV Gallery into the module:

- Inserting a gallery in Custom Putput:

+ If you have installed the button plugin, click on 'insert gallery' and configure the properties of your gallery (see Insert Gallery's property box), then click on 'insert'

+ If you only installed the system plugin, manually type down the code in this pattern:

```
{jvgallery folder="images/gallery" theme="1" height="100" width="120" cols="0" }  
1.jpg="title|desc" 2.jpg="title|desc" 3.jpg="title|desc" {/jvgallery}
```

** remember to replace the dummy info (ex: images/gallery) with the appropriate one for your site.

- Insert Gallery's Property LightBox:

+Choose Folder: Select the folder where the images are stored

+Title and description: Allow you to set the images' titles and descriptions.

After you have selected the folder, image names will be shown in this field in the following pattern: <image name>="title|desc"

Replace 'title' with the title you want to assign to that image and 'desc' with that image's description.

For more info, please read JV Gallery's document.

JV News

* Using JV News to make your site look more like a quick-start installation and the demo site:

- Create 2 article categories: "latest news" and "recent news" and a few articles in each category.
- In back-end Module Manager, create 2 JV News type modules named "Aliquam pellentesque nunc" and "Pellentesque nunc liquam".
- Enable those module, then assign them to the position 'bots-1' and 'bots-2' respectively.
- In Menu Assignment, set them to be shown only in Home page.
- In "Aliquam pellentesque nunc", select "latest news" in the 'categories' parameter.
- In "Pellentesque nunc liquam", select "recent news" in the 'categories' parameter.

For the parameters' effects, please refer to the JV News User Guide

The screenshot displays a Joomla! website frontpage with several modules. On the left, there is a 'Gallery' module with a grid of images and a 'Top News' module with a featured article. The main content area features a 'Welcome Frontpage' module with a large image of bread and a 'Read more' button. Below this, two JV News type modules are highlighted with a red border: 'It has survived not only five centuries' and 'The wise man therefore'. A red arrow points from a red box on the right to these modules, containing the text: 'JV-News type Modules: "Aliquam pellentesque nunc" and "Pellentesque nunc liquam"'. At the bottom, there is a copyright notice: 'Copyright © 2011 JV-Restaurant. All Rights Reserved. Designed by Joomtavi.com. Joomla! is Free Software released under the GNU/GPL License.'

*This is the end of the Joomla! Template: JV Restaurant User Guide
I hope it'd be useful for those who took an interest in this template but had trouble
figuring out how it works.*
